Exposed Aggregate Pool Finish

Swim with the Sun

Transform an ordinary pool into a work of art, with SunStone® exposed aggregate swimming pool finish. This remarkable formula adds the sparkle of life to any pool - and it's as hard and as tough as any pool surface today.

Durable Beauty...

...That's what makes a great pool finish. We've formulated a swimming pool finish that delivers brilliant beauty year after year. We call it SunStone because it combines time-proven natural materials with advanced aggregate technology to produce a dazzling finish that's easy to install and maintain.

Built for Looks...Built to Last

Customize your pool with SunStone's variety of colors and textures. Wear resistance makes SunStone a must for heavily used family pools, specialty pools and commercial installations. Invest in fun with SunStone.

Long-Lasting, Easy to Install

SunStone® is a combination of durable quartz aggregate and enhanced Portland Cement, accented with Colored Quartz aggregate. The result? A magnificent pool finish that not only looks great but resists the effects of extreme weather, harsh chemical treatments and degradation. SunStone® is ideal for new pools, as a refinish to existing pools, spas and water designs in any environment.

Have Some Fun in the Sun with SunStone!
